A further study of visual perception by M. D Vernon([Book](#))

38 editions published between 1952 and 2013 in English and held by 592 WorldCat member libraries worldwide

Originally published in 1952, this book was built upon a reconsideration of the findings presented in Vernon's 1937 title, Visual Perception. The text puts forward the 'belief and contention that the individual constructs his perceived world as far as possible in accordance with the maintenance of the maximum of stability, endurance, and consistency'. An appendix section and indices are also included. This book will be of value to anyone with an interest in perspectives on the nature of visual perception
